JAPANESE TERRITORIAL GAINS IN CHINA during the first twelve months of the Sino-Japanese War are shown in this special Tetegraph map. Although the Japanese are nominally in possession of the shaded areas their gard on the country is most insecure, owing to the enormous activities of guerillas, who are constantly harassing the Japanese even as far north as Peiping and Tientsin, where the conflict started twelve months ago (Chinese flags were hoisted in the suburbs of Tientsin during the week-end). It may be said that, with the exception of the railway areas, the Japanese exercise little more, if any, control over the shaded areas than the Chinese regular army.

PEAK MURDER CASE OPENS AT SESSIONS

Former Cookboy Held For Slaying of Mrs. Challinor

The trial of Lam Chun, 30-year-old former cookboy, held for the murder of Mrs. Sybil Ruby Challinor, wife of Mr. R. H. Challinor, of Imperial Chemical Industries (China), Ltd., was commenced before Mr. Justice R. E. Lindsell, Acting Chief Justice, at Criminal Sessions this morning.

Mr. J. Whyatt, Crown Counsel, is appearing for the prosecution, and accused is represented by Mr. H. C. Macnamara, instructed by Mr. M. A. da Silva.

It is alleged by the Crown that accused stabbed Mrs. Challinor to death in her bedroom on the morning of May 5.

Housewife's Bookshelf

THE books on child care are numerous and useful; but few ly each afternoon millions of baking, and are generally a little L answer all those questions which the young mother wants to know. In this connection Dr. Mary Anthony's book "Happy Childhood," is unusually comprehensive and deals with the various little crises which may occur in the baby's first years. Written in a simple style, the instructions are easily followed.

The present-day mother realises that the rearing of children is not done by instinct, and that accurate information is necessary for the care of the child.

Not only must she know something about caring for the baby's physical needs, she must also have some understanding of his mind, so that she can bring him up to be happy and self-reliant.

The first five years of life are the most important, as during this time the foundation of a normal, healthy life should be well and truly laid. These impressionable years can never be recalled.

The chapters on habits and learning to talk are of practical value in helping on a difficult or backward child.

MENERAL family life is not overlooked in this book. Dr. Mary Anthony orranges the baby's day and the toddler's day so that the bath, dressing and meal times will fall in with other household arrangements.

A particularly useful part is the section dealing with infectious disease and the treatment of skin troubles.

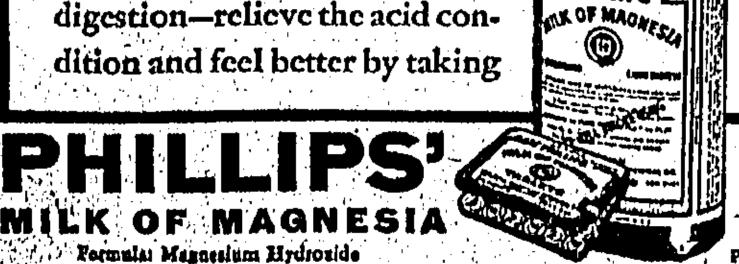

In England, the child who goes through the winter without a cough or a cold is exceptional. In "Happy Childhood" there are many suggestions for the prevention and cure of the common cold, and its all too frequent sequel, bronchitis.

The routine chapters on ante-natal diet and infant feeding are well done. They give the most up-to-date ideas in an attractive form. The expectant mother has two chapters all to herself, which she will find interesting and instructive.

.I have no hesitation in commending this book not only to mothers-tobe but to grandmothers, aunts, and all the kindly race of women who cheerfully look after other people's children. G. B.

Its surging, invigorating foam reaches every pit and crevice. It removes ugly stains and destroys dangerous mouth germs that cause tooth decay. Try Kolynos—its clean, cool taste is delightfully refreshing. It is most economical too-because you use only half as much as ordinary toothpastes. One-half inch on a dry brush is enough. "No amount of modification after construction can, however, make these ships so good as they might have been if properly designed in the first place.

USE OF GYROSCOPES

"Because of the great difficulties and many failures the Japanese Navy is experiencing over stability with its ships, large experiments are being carried out with gyro stabilisers. I understand that Japan is fitting gyro stabilisers to her two new aircraft carriers, Hiryu and Sryu. Japan is determined to stabilise these ships by artificial means.

"Japanese engineers are of the opinion that the failures with gyro was built; a curlous survival of | stabilisers has been due to the use mediaeval into modern times. of gyroscopes of too little weight. the conclusion that an efficient gyro stabiliser must have a weight of at branch of British Freemasonry which least three per cent, of the total displacement of the ship. Many British engineers are of the opinion that no efficient hull capable of withstanding such internal strain could be built.

"It is impossible to assess accurately the power of the Japanese Navy, but British naval circles consider that it can never be the force that Japan desires it to be until Japanese warship designers show fuller appreciation of the fact that seaworthiness is the first requirement of any vessel."-Reuter.

(Continued from Page 6.)

The Templars who worshipped They are reported to have come to Baphomet were, of course, an entirely different organisation from that that the gyroscopes to be fitted to salem in A.D. 1119, made it their covert ambition to rebuild the Temple of Solomon on the lines loid down by the Prophet Ezekiel. They hoped thereby to shift the centre of the Christian world from Rome to with the Patriarch of that city in

the aim of supplanting the Papacy. The broadmindedness which they affected for this purpose brought them into contact with the occult sects of the East. The leaders of the Templars were initiated into the secrets of the Jewish Cabbala, and eventually the inner circles of the Order adopted the worship of Baphomet, a pantheist figure whom they propitiated with peculiar rites.

BOURN-VITALITY What is it?

Mhen one thinks

of the fact that not millions but milliands of microbes and bacteria are living in a neglected mouth, that is, in a mouth that has not been daily antisoptically cleansed, it seems nothing less than dis- ? gusting to allow such distruction to continue in our mouths and teeth

It is simply incredible that there still exist many educated people who refuse to realise that it is an absolute necessity not only for the preservation of the teeth, but also for

from the bacteria which destroy their teeth. Odol arrests most thoroughly and effectively all fermentation and decomposition in the mouth. Everyone who uses Odol regularly every day insures the greatest protection for his teeth and mouth that signific discovery has up to the present time made possible. If that seems a trifling reform to come so early on a dictator's list, let me point out that it is important because it is a symptom of what may be called the "official" attitude to music in England.

MASS-PRODUCED FIGHTERS

(By A Special Correspondent)

London, June 1.

Lord Nuffield plans to produce aeroplanes for the R.A.F. at a rate of 5,000 a year.

The Birmingham City Council is to consider an application on his behalf to purchase land for a factory at Castle Bromwich, which is at present scheduled for a housing scheme.

No doubts are entertained that the sale of the site will be sanctioned.

Lord Nuffield will then order the speedy erection of a factory devoted entirely to the production of airframes of the very latest type, which will be fitted with Rolls-Royce engines.

The machines will be intercepter fighters of a type \(\frac{1}{2}\) evolved only recently, and which has just passed its official tests.

OUTSIDE SHADOW SCHEME

The factory is to be entirely apart from the shadow factory scheme on which other motor manufacturers are engaged, for champion letter-writer to the Press, died recently, aged Lord Nuffield is still of opinion that the shadow scheme is 81, having written his last letter from his death-bed. technically wrong.

With 108 competitors in the Lawn Bowls open singles championships, 44 matches will be played altogether in the first round, which commences this afternoon with a heavy programme of 24 ties. All clubs placed their green at the disposal of the Hongkong L.B.A. and to-day's matches will be decided on six of the best greens in the Colony.

All the first-round matches have been arranged to be played off by July 20, and it is hoped that if the weather does not interfere with the Association's plans the second round will be started on July 25.

As probably to be expected, the first-round ties contain little of really great interest. Few of the "glants" of the tournament have been drawn together yet, and the matches to-day are likely to produce little over which to enthuse.

On the Police green, the best match seems to be that between J. F. Mc-Gowan and A. R. Dallah. The Indian R. C. skip is playing particularly well at the moment and seems to have overcome his uncertainty which has been so patent in several of his League games. Therefore, unless the Civil Service player can play at the top of his form Dallah should enter the second round.

B. W. Bradbury, of the Crigengower C.C., has been drawn aganist a team-mate, A. J. Coelho, a stendy drawing man. Judging by experi-ence and recent form, a win for Bradence and recent form, a win for Bradbury is clearly indicated, "josa" plays

he is not able to win. Another good match on this green should be played between B. Basto, of the Club de Recreio, and H. G. Cooper, of Kowloon Docks, Both are versatile players and an entertaining game is in store for spectators. Though he has only just recovered from inness, A. E. Coates, the 1936 champion, should beat C. Vas at Kowloon Dock, while C. Silva also should enter the next round at the expense of H. F. Harper. The full programme to-day is as

England was made to look particularly silly at the Olympic Games in Berlin a couple of years ago, and with the sting of that lesson still itching our hides, it would be foolish to walk right into another blunder, Saxon declares.

It is reported that Japanese warships have commenced to bombard Kiukiang, where China's most massive boom has prevented shipping from proceeding either up or down the river for several months past.

"We are gratified at America's efforts to comply with our requests," the Japanese spokesman said.

However, it appears that the Japanese report is not strictly accurate, as the U.S. Naval authorities have denied that they have informed the Japanese Navy that they are definitely avolding danger zones. An American navel spokesman said that the American policy remained unchanged, namely, avoiding danger when possible but protecting Americans at any cost. Reprisals by Arabs Feared Following Bomb Outrages

Jerusalem, July 11.

In week-end rioting 65 are dead and about 200 wounded.

Three-quarters of the dead and wounded are Arabs, leading to fears that there will be retaliation for Sunday's violence.

Terrorist activities on the Sabbath included the bombing of two Haifa buses crowded with Jews, one being killed and 31 being wounded, several critically.

Another bomb wounded ten Jews, and one that exploded near the King David Hotel in Jerusalem wounded two Jews.

An unexploded bomb was found in front of an Arab movie theatre in Jerusalem.

British troops and marines constantly patrolled Haifa and Jerusalem, while the searchlights of H.M.S. Repulse turned night into day as they swept the waterfront.

-Housewife's Bookshelf

THE books on child care are numerous and useful; but few A answer all those questions which the young mother wants to know. In this connection Dr. Mary Anthony's book "Happy Childhood," is unusually comprehensive and deals with the various little crises which may occur in the baby's first years. Written in a simple style, the instructions are easily followed.

The present-day mother realises that the gearing of children is not done by instinct, and that accurate information is necessary for the care of the child.

helping on a difficult or backward child.

CENERAL family life is not overlooked in this book. Dr. Mary Anthony arranges the baby's day and the toddler's day so that the bath, dressing and meal times will fall in with other household arrangements.

A particularly useful part is the section dealing with infectious disease and the treatment of skin troubles.

In England, the child who goes through the winter without a cough or a cold is exceptional. In "Happy Childhood" there are many suggestions for the prevention and cure of the common cold, and its all too frequent sequel, bronchitis.

The routine chapters on ante-natal dict and infant feeding are well done. They give the most up-to-date ideas in an attractive form. The expectant mother has two chapters all to herself, which she will find interesting and instructive.

college of Cardinals in 1935, The Archbishop of Rheims, in his sermon to-day, referring to the forthcoming Paris visit of King George V and Queen Elizabeth declared that France would never forget friends, and Paris would demonstrate this with fervour in a few days.

A three-day festival to celebrate the restoration of the Cathedral began on Friday, when Mr. William C Bullitt, the United States Ambassador to France, was made an honorary citizen of Rheims in recognition of the many benefits bestowed upon the town by Americans,

The celebrations included a 12th Century mystery play and the floodlighting of the Cathedral.—Renter,

was built, a curious survival of mediaeval into modern times. The Templars who worshipped Baphomet were, of course, an entirely different organisation from that branch of British Freemasonry which now bears their name. The original Knights Templars, founded in Jerusalem in A.D. 1119, made it their covert ambition to rebuild the Temple of Solomon on the lines laid down by the Prophet Ezekiel. They hoped thereby to shift the centre of the Christian world from Rome to Jerusalem, and were secretly leagued

with the Patriarch of that city in the aim of supplanting the Papacy.

The broadmindedness which they affected for this purpose brought them into contact with the occult sects of the East. The leaders of the Templars were initiated into the secrets of the Jewish Cabbala, and eventually the inner circles of the Order adopted the worship of Baphomet, a pantheist figure whom they propitiated with peculiar rites. And now this, perhaps the last idol left in Europe, stands forsaken in a pit beneath the garden of a shuttered Italian country house, and the boys took their oaths and celebrated their

LAWN BOWLS SINGLES TOURNAMENT STARTS TO-DAY

44 MATCHES FIRST ROUND OF CHAMPIONSHIP

PRELIMINARY GAMES ARE LIKELY TO BE DULL

(By "Abe")

With 108 competitors in the Lawn Bowls open singles championships, 44 matches will be played altogether in the first round, which commences this afternoon with a heavy programme of 24 ties. All clubs placed their green at the disposal of the Hongkong L.B.A. and to-day's matches will be decided on six of the best greens in the Colony.

All the first-round matches have been arranged to be played off by July 20, and it is hoped that if the weather does not interfere with the Association's plans the second round will be started on July 25.

As probably to be expected, the first-round ties contain little of really great interest. Few of the "giants" of the tournament have been drawn together yet, and the matches to-day are likely to produce little over which to enthuse.

On the Police green, the best match seems to be that between J. F. Mc-Gowan and A. R. Dallah. The Indian R. C. skip is playing particularly well at the moment and seems to have overcome his uncertainty which has been so patent in several of his League games. Therefore, unless the Civil Service player can play at the top of his form Dallah should enter the second round.

B. W. Bradbury, of the Crigengower C.C., has been drawn aganist a team-mate, A. J. Coelho, a steady drawing man. Judging by experience and recent form, a win for Bradence and recent form, a win for Bradbury is clearly indicated, "joss" plays such a part in lawn bowls that anything may happen.

Four matches have been fixed for the Taikoo green, but I doubt whether anyone of the eight is likely to Off Yesterday go very far in the championship,

-Another good match on this green should be played between B. Basto, of the Club de Recreio, and H. G. Cooper, of Kowloon Docks, Both are versatile players and an entertaining game is in store for spectators.

Though he has only just recovered from inness, A. E. Coates, the 1936 champion, should beat C. Vas at Kowloon Dock, while C. Silva also should enter the next round at the expense of H. F. Harper. The full programme to-day is as follows:

SWING STARTS

Because of being regarded as one of the weakest members of the United States Walker Cup team, the victory of Charles Yates in the British Amateur championship came as a surprise

not, at first sight, impressive. and this, I think, is where most people went wrong. Forming a judgment of a player's worth from style alone is often misleading. Don Bradman is not the perfect stylist, but he gets the runs; Yates's swing is not ideal, but he produces the figures. After all, that is the acld test in elther game.

In the matter of style, we cannot all be a Jones or a Cotton, though in their case each has a totally different swing—classical of its type. But what does it matter so long as the results are the same? By comparibecause it lacks something of smoothness and rhythm false conclusions are drawn.

Fundamentally, there cannot be of a player possessing so good a record as that of Yates. He has been the national inter-collegiate champion, Georgia State and Western champion—a major title—and leading amateur in the famous Masters' tournament; and he is only twentyfour years of age. Yates is the playing partner of R. T. Jones, and just before leaving for England the new champion accomplished a score of Dyer defeated R. Young (6) by four 64-eight strokes under par-at East

In this respect Yates is no exception; indeed, he is more interesting than a good many previous champions.

Let me at once dispel the notion that, because Yates and Jones learned their game on the same course and play a lot together, there is much in common in their styles and methods. In a general sense there is little or nothing in common, but in one or two particulars which I regard as not unimportant there is a distinct simi-

It takes an athlete just on three months to get racing fit, and in a little more time than that the European games are to be decided in Paris, writes "Slip" Saxon, the 1938 Powderhall sprint Champion, in a special article.

"Britain did not support the first games four years ago," he continues, "but now that they have given the O.K. to the French fixture it would be interesting to know just what the British Athletic Association Board intend doing about getting a team

together." England was made to look particularly silly at the Olympic Games in Berlin a couple of years ago, and with the sting of that lesson still itching our hides, it would be foolish to walk right into another blunder,

Saxon declares. At the moment England is quite. unprepared and it would not be a blind guess to suggest that little thought had yet been given to organising a team for an onslaught on

NEED FOR SKILLED TUITION

"The ancients who serve in official capacities in this country would be sure to kick, and kick viciously at that, against any suggestion of organised national training," writes "Slip," "probably on the threadbare score that a scheme of that nature would be carrying sport beyond the realm of the game.'

It is lack of really skilled tuition and the inability to obtain the necessary impediments that is holding up son, Yates's style is inclegant, and progress and not from any want of enthusiasm on the part of the athletes, Saxon maintains:

Admittedly progress has been made of a kind in recent years but very much amiss with the methods of a very sluggish kind. There are isolated instances of budding genius, but the official attitude that "we are doing very nicely with field events, thank you," reminds Saxon of the ostrich sticking its silly head into the

SALISBURY.

CHEEP shearing has begun on the Wiltshire Downs.

The many flocks are being rounded up by shepherd and dog-neighbour helps neighbour.

As the strength of the sun increases, sheep feel the weight of their fleeces and are glad to be rid of them. The shearer follows a skilled and ancient craft.

To-day we were among the flock of about 450 cross-bred ewes and lambs belonging to young Mr. J. F. H. Thomas, Stoke Farm, Broadchalke, Wiltshire.

His flock grazes upon a thousand wide acres of upland pastures that can fatten a sheep without the aid of trough or cake tub. Finding that their shepherd, Bert Gulliver (Mackie, to his confederates) was across at Knowle Farm, Bowerchalke, we went over the valley.

Shepherd Gulliver's dog, Nell, stayed at home with Dinah, the farmer's daughter. We found Mackie and another shearer, Stanley Emm, about halfway through Mr. Williamson's 500 ewe tegs. "We'll be finished they b'to-morrow, somewhen that'll allow us to make a start on Mr. Thomas' first thing a Wednesday."

"Sixty Apiece"

Mr. Williamson's ewe flock was wiped out by foot-and-mouth disease early in January. With the compensation money he has bought this grand lot of last season's ewe lambs with which to restart his downland flock. This is their first shearing, "Sixty apiece" is a good day's shearing. Time must be allowed for the occasional "wet" or the cleaning of clippers. A couple of Mr. Williamson's chaps, Albert King and Wally Frampton, stand by to give a hand to the shearers.

"Watch him go over their eyes and cars: A good shearer never flinches," says Albert to the visitors. The work is hard, the days are

CHINESE ABANDON YANGCHENG

City Has Cost Many Lives To Win And Lose

Chengchow, July 11. After a brief re-occupation of Yangeheng, important south-east Shansi town, Chinese troops have evacuated the place again for strate-gle reasons, it is officially announced.

The Chinese withdrawal was effected following a Japanese flunking movement. Retrenting to the hilly regions on the outsicirts of the town, the Chinese have creeted strong defence works.

The Japanese who captured Yangcheng, a detachment of about 700 men, were from Tsingcheng, thirty kilometres east of Yangeheng near the Honna border. After repeated fallures in frontal attacks, they succeeded in forcing the Chinese to retreat in a flanking move.

Yangcheng, it is recalled, was only recently regained by the Chinese troops after a long siege followed by a hot engagement in which 500 Japanese were killed and much military equipment seized.

Giving up their attempt to hold the town, the Japanese garrison at Yangcheng finally broke through the Chinese cordon and retreated eastward, leaving behind many dead and quantities of ammunition. Chinese entered Yangcheng on the heels of the Japanese retreat. Now they have abandoned the place once again for strategic reasons,-Central
